DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 109, 110, 112-116, 119 and 120 are rejected under 35 U.S.C. 102(a) as being anticipated by Shirasaki et al. This reference discloses in col. 3, lines 20-67, col.5, lines 10-30 and col. 7, lines 10-25 a method of making a light emitting device by providing a transparent substrate and applying by ink jet printing fluorescent materials in a pattern that emits light of different colors and depositing electrodes. It is the examiner's opinion that the claimed method is anticipated by the method of the reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 111, 117, 118 and 121 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shirasaki et al for the same reasons as urged above. It is the

examiner's opinion that the limitations of these dependent claims are conventional and do not render these claims unobvious.
